調查結果：頻數及百分比分佈
Survey Results: Frequency and Percentage Distribution

調查概況及抽樣方法
Survey Overview and Sampling Method

調查項目： Survey Project:	市民對香港落實「一國兩制」概況評價調查（第十二次調查） Survey on the Implementation of 'One Country, Two Systems' in Hong Kong　(Twelfth Round)
調查日期： Date:	2021年12月20日至2022年1月10日（晚上6時15分至10時15分） 20 December 2021 – 10 January 2022 (6:15 pm - 10:15 pm)
委託機構： Commissioning Body:	民主思路 Path of Democracy
執行機構： Polling Agency:	香港中文大學香港亞太研究所電話調查研究室 Telephone Survey Research Laboratory, Hong Kong Institute of Asia-Pacific Studies, The Chinese University of Hong Kong
調查對象： Target Respondents:	18歲或以上、操粵語或普通話的香港居民 Hong Kong citizens aged 18 or above speaking Cantonese or Mandarin
調查方法： Survey Method:	調查樣本採用雙框電話號碼取樣，包括家居固網和手機電話，利用電腦輔助電話訪問系統進行資料蒐集工作。以隨機抽樣方式訪問1,003名18歲以操粵語或普通話的市民，其中家居固網有497名，手機電話有506名，回應率分別為30.6%及30.0%。在95%置信水平下，抽樣誤差為±3.09%，符合科學性的調查標準。 A dual-frame method consisting of landline and mobile was adopted. Samples were randomly selected using a CATI (Computer-Assisted Telephone Interview) system. 1,003 respondents aged 18 or above speaking Cantonese or Mandarin were interviewed. 497 were surveyed on landline and 506 on mobile with respective response rates of 30.6% and 30.0%. The sampling error is within ±3.09% at 95% confidence level, satisfying the scientific standards of survey.
數據加權： Weighting:	由於調查樣本採用雙框電話號碼取樣設計，調查結果以樣本被抽中的機會和香港統計處最新公布的性別及年齡分布作加權處理，以更反映香港人口分布的真實情況。此外，由於經加權數據或會出現四捨五入，統計表內個別項目數字相加後可能與總數略有出入。 As the survey sample adopted a dual-frame method, all data were weighted by the probability of being sampled and the latest proportion of gender and age according to the Census and Statistics Department, to better represent the distribution of the Hong Kong population,. The figures in this survey may not add up due to rounding errors and weighting.

註：以下所有數據均經加權處理。計算平均分時，「88. 唔知道／好難講」的樣本不包括在內。

Note: All data were weighted for analysis. When calculating the mean, samples responded "88. Don't know / Difficult to say" are excluded

「我哋想了解市民對『一國兩制』喺香港實踐嘅情況，如果1分代表『非常不同意』，7分代表『非常同意』，你有幾同意以下香港喺回歸後嘅情況呢？」(Q1至Q9的次序會隨機顯示)

'We would like to know how the public understands "one country, two systems" in Hong Kong. On a scale where 1 indicates "strongly disagree" and 7 indicates "strongly agree", to what extent do you agree with the following descriptions of Hong Kong after the handover?' (The sequence of Q1 to Q9 will be randomly displayed)

Q1 「回歸之後，香港實行到高度自治，自行處理特區內嘅行政事務。你有幾同意呢？1至7分，你會俾幾多分呢？」

Q1 'After the handover, Hong Kong has been able to practice a high degree of autonomy, and has been able to handle its own internal administrative affairs. To what extent would you agree? From 1 to 7, what score will you give?'

有關調查數據加權的說明
Explanatory Notes on Weighting

電話調查部分採用雙框抽樣設計，從家居固網電話號碼及流動電話號碼的結合樣本群中隨機抽取號碼。按照常見做法，數據在進行分析時依香港的人口分佈作加權處理。加權因子主要按香港政府統計處公布的2021年年中18歲或以上性別及年齡分佈（扣除外籍家庭傭工）為基礎，將調查中所得的有關分佈與人口統計的分佈作比例性調整，以便使調查的性別及年齡分佈接近2021年年中（扣除外籍家庭傭工）人口的分佈。由於大部分人同時擁有家居固網電話號碼及流動電話號碼，為免重複計算或其他不明原因帶來的估算偏差，加權方法將按兩個步驟調整。有關資料表列如下：

A dual-frame sampling design was adopted. It randomly selects phone numbers from a combined sample of residential landline and mobile phone numbers. As a standard practice, survey data will be weighted by population distribution in Hong Kong. The weighting factors were adjusted by the proportion of gender and age of people aged 18 or above (excluding foreign domestic helpers) according to the mid-year population for 2021 statistics released by the Census and Statistics Department. Given many individuals may own both landline and mobile phone numbers, two steps were added in the weighting method to avoid estimation inaccuracy caused by double-counting or other unknown factors. The weight factors are as below.

年齡組 Age Group	香港人口分佈（%） Population Distribution* (%)		調查樣本分佈（%） Distribution of Sample (%)		加權因子 Weighting Factors	
	男 Male (A)	女 Female (B)	男 Male (C)	女 Female (D)	男 Male (A÷C)	女 Female (B÷D)
18-29	447500	430100	613109	528798	0.729886039	0.813354653
30-39	461000	521300	738173	548645	0.624514900	0.950158903
40-49	460300	575000	955014	698857	0.481982631	0.822772553
50-59	518400	627200	691956	818239	0.749180243	0.766524251
60-69	527500	539400	774567	819710	0.681026008	0.658037592
≥70	440400	521900	504759	436406	0.872495729	1.195904748

* 扣除外籍家傭 excluding foreign domestic helpers

步驟一：電話號碼擁有量
Step 1: Telephone ownership

由於每人擁有不同數目的固網及流動電話號碼，他們被抽中的機率也有不同。為剔除任何一人被超額代表的機會，第一步驟是估算每名受訪者被隨機抽中的機會率，即以每位受訪者擁有家居固網電話號碼和手機號碼數目，對比全港家居固網電話及手機號碼總數。加權因子1（WT1$_i$）之計算方式為受訪者i被抽中訪問的逆向機會率，即$WT1_i = \pi_i^{-1}$。

Since each individual owns a different amount of landline and mobile numbers, each has a different probability of selection as respondents. To eliminate over-representation of any individual, the first step is to approximate the probability of selection for each respondent. It is a ratio of the amount of landline and mobile numbers owned by a respondent to the total number of those in the territory. Weighting factor 1 (WT1$_i$) is calculated by the inverse of probability of selection of individual i, i.e. $WT1_i = \pi_i^{-1}$.

$$\pi_i = \frac{n_L}{N_L} \times \frac{t_i^L}{e_i^L} + \frac{n_m}{N_m} \times t_i^m$$

當中	i	=	第i名被抽中的人士
	n_L	=	家居固網電話號碼樣本數目
	N_L	=	全部家居固網電話號碼總數
	t_i^L	=	第i名人士家中擁有的固網電話號碼數目
	e_i^L	=	住戶中合資格受訪人數
	n_m	=	手機號碼樣本數目
	N_m	=	全部手機號碼總數
	t_i^m	=	第i名人士個人擁有的手機號碼數目

Where	i	=	i-th person selected
	n_L	=	amount of sample's landline numbers
	N_L	=	amount of population's landline numbers
	t_i^L	=	amount of i-th person's landline numbers
	e_i^L	=	amount of eligible respondents in the household
	n_m	=	amount of sample's mobile numbers
	N_m	=	amount of population's mobile numbers
	t_i^m	=	amount of i-th person's mobile numbers

步驟二：人口估算
Step 2: Population estimates

為了保證調查數據更能反映香港人口分佈的真實情況，數據在進行分析時依香港統計處最新公佈的18歲或以上性別及年齡分佈（扣除外籍家庭傭工）。加權因子2（WT2）的計算方法，是把人口統計中性別和年齡組別的人口估計，除以經過加權因子1加權後的調查中對應組別的人口樣本。

To better represent the distribution of the Hong Kong population, all data were weighted by the proportion of gender and age of people aged 18 or above (excluding foreign domestic helpers) according to the latest population distribution released by the Census and Statistics Department. Weighting factor 2 (WT2) is calculated by dividing the population estimates of a gender and age group by the sample size of the corresponding group adjusted by weighting factor 1.

最後步驟　Final Step

最終加權因子的計算方法如下：
The final weighting factor is calculated by the following formula.

$$WT\_F = WT1 * WT2$$

當中	WT_F	=	最後加權因子
	WT1	=	加權因子1
	WT2	=	加權因子2

Where	WT_F	=	Final weighting factor
	WT1	=	Weighting factor 1
	WT2	=	Weighting factor 2

步驟二：人口估算

19
